METAL SPINNING Take advantage of the possibilities of this interesting process. If the metal spinning used by specialists, unmatched by any forming process particularly for single pieces or small series its profitability. Diameter of $D=10\text{mm}$ to $D=1'500\text{mm}$ Material thickness of $s=0.5\text{mm}$ to $s=6.0\text{mm}$ All metals (aluminum, stainless steel, steel, titanium, silver, gold ...) metal spinning funnel

DEEP DRAWING Less is often more! With the possibilities of deep drawing we fabricate items where other methods are dependent on the assembly of several parts long. Use this advantage with integrated cost reduction. Across corners part of $E=10\text{ mm}$ to $E=1'100\text{mm}$ Material thickness of $s=0.5\text{mm}$ to $s=6.0\text{mm}$ All metals (aluminum, stainless steel, steel, titanium, silver, gold ...) deep drawing 1 ferrule
