Fax: +49 (0)7159 17271

The Leuze Company offers a broad range of products connected with the field of surface coating and the pre-treatment of the surfaces. Grit blasting, degreasing and washing, priming, varnishing or powder coating - all these from one single hand.

Together with you we can choose from our product line the right coating solution for your application which will satisfy the highest quality standards. We apply in our company many of the current technical processes of metal surfaces coating with plastics.

COATINGS FLUIDIZED-BED SINTERINGCoatings

with polyamide and polyethylene are produced in our factory with the fluidized-bed sintering method.

The products covered by this method are single or series components, manufacturing parts, special shaped pieces.

More about » Fluidized-bed sinteringELECTROSTATIC POWDER SPRAYINGThis procedure is used in our factory for the production of HALAR-coatings (ECTFE). These coatings stand out due to their extreme good chemical resistance in

aggressive environment (acids and bases).

More about » Halar-coatings  
THE MINICOAT-PROCEDURE  
The Minicoat-procedure is being used in Polyamide coating of small pieces in mass production.

More about » Minicoat coatings  
SPRAYING  
Spraying with solvent is being used in our factory for the production of FEP and PTFE coatings.

More about » PTFE coatings  
FLAME SPRAYING  
We produce by flame spraying corrosion protective coatings (aluminium, zinc) as well as wear resisting coatings (molybdenum, brass, ceramics). These coatings together with polyamide or PTFE coatings assure special properties of the workpieces.

More about » Flame spraying  
SURFACE PREPARATION  
We make in our factory all preparation works (degreasing, grit blasting, priming).

More about » Surface preparation  
QUALITY  
As a matter of course, quality plays a major role in all what our company is doing. This is being guaranteed by a certified system of quality management.

More about » Quality  
IN-HOUSE PRODUCTION  
For several years we started together with our partners to produce our own products. These are available coated as well as uncoated items.
