Our speciality: PARTIAL & TOTAL OVERHAULS

With our highly motivated team we revise your machines according to the latest quality and safety regulations. We carry out partial or total revisions according to customer requirements, with or without new painting. Be it accessories, apparatus or complete machines. We also take care of all scraping work or electrical installations / conversions for you.

We are there for you worldwide...

No matter whether we can help you in China, the USA, Russia, Eastern Europe, Australia or anywhere else, our team is not afraid to make your machinery run smoothly. Did you know that we provide on-site training all over the world to familiarize your staff with the correct handling of your machines? This reduces high maintenance costs and the machine runs flawlessly. With almost 40 years of experience, we are your international specialist for repairs & retrofitting of bar turning & machine tools (conventional as well as CNC controlled).

We are an innovative family business specializing in the repair and overhaul of bar turning / machine tools (conventional as well as CNC controlled), loading magazines, spare parts and accessories. The managing director Peter Brotschi and

his wife founded the family business BroRep AG in 1998 with many years of experience in the industry. Over the years the company has continuously developed and expanded.

**PARTS SEPARATING SYSTEMS**ServicesWith decades of experience we are your

international specialist for:Repairs & ModificationsPartial- & Total

overhaulingsService calls (mechanical & electrical)Control devices (VarioCam /

VarioSpeed)Spare Parts & Ball BearingsDevices & Accessoriesmachine

tradeBarfeeder & - transformationsProtection caps (CE standard)Parts separating

system

**REPAIRS & MODIFICATIONS**

In our modern workshop in Altreu near Selzach (SO) in the heart of Switzerland, we

carry out mechanical & electrical repairs & conversions of all kinds according to

your wishes and requirements. With decades of experience we are (among other

things) your specialist for:TORNOS automatic lathes / CNC machines / multispindle

lathesSCHAUBLINAGATHONetc...

**PARTIAL- & TOTAL OVERHAULINGS**

Even today, the conventionally controlled machine brings more precise work, higher

quantity and quality. With a total or partial overhaul of your existing machinery,

investment costs are reduced and sales increased. Our team is specialized in

retrofitting various types of machines, but in particular:CAM MACHINESMULTI-

SPINDLE AUTOMATIC LATHESCNC CONTROLLED MACHINESVARIOUS MACHINE

TOOLS & OTHER TYPES

**SERVICE CALLS (MECHANICAL & ELECTRICAL)**

We carry out mechanical repairs or electrical service directly on site in your

company. Fast, uncomplicated and reliable. We also offer this service

internationally. Among other things, we take care of the following work:

Troubleshooting (mechanical & electrical)New bearings for the work spindles (e.g.

Multi-Tornos)Electrical work of any kind / DepannageBar feeders extension &

servicePreparing machines for transport / packaging, loading

#### CONTROL DEVICES (VARIOCAM / VARIOSPEED)

Our electrical department has developed a control system that allows you to program the speed of the spindles and the cam shaft variably on an eccentric cam machine. This allows the production speed to be increased and tool wear to be reduced.

The VarioMotion is a control variant with servo drives. This makes it possible to stop the spindle at any position in order to perform a cross operation (such as drilling, milling, etc.).

#### BARFEEDER & -TRANSFORMATIONS

We are happy to repair your defective loading magazine or offer you a complete conversion of the machine to another model. We take care of a functional electrical cabinet and make sure that the programming of the new machine is correct.

Alternatively, you can have your existing conventional machine park converted to a CNC-controlled control system.

#### PROTECTING CAPS (CE-STANDARD)

We offer exclusively manufactured protective hoods for Tornos machines. The protective hoods are convincing due to their highly intelligent technology and the excellent quality of the materials used.

#### PARTS SEPARATING SYSTEMS

We can now offer you a parts separator system that significantly simplifies the inspection of production using random sample containers and can save you time and money.

With different sizes and diameters they adapt to your production machine. They are easy to assemble and convince with their modern design.

#### DEVICES & ACCESSORIES

In our warehouse there are numerous apparatuses & various accessories for the common mono- and multi-spindle machines. Even if you are looking for something special, we will probably be able to get it for you.

#### SPARE PARTS & BEARINGS

You can obtain most spare parts for Tornos machines and other manufacturers

directly from us.
