Tuboly-Astronic has been developing and manufacturing machines for the production of transformers for nearly 30 years. All our knowledge and experience manifests itself in the hardware, software, system integration and service we provide to our customers.

Our paramount goal is to equip our clients with an automation degree that allows them to manufacture their products with the highest possible efficiency.

Products

Coil winding
HV wire winding machines
LV foil winding machines
HV foil winding machines
Vertical winding machines
High-Quality Horizontal Winding Machines for Power

Transformers
Wire winding machines for instrument transformers

Tuboly Astronic winding machines ensure highly efficient coil production and total ease of use. Our state-of-the-art technology guarantees maximum availability and operational safety as described by the law.

Core manufacturing

Core cutting lines
Stacking systems

Our core cutting lines and stacking systems are made to meet your specific requirements. From standardized lines up to customized solutions, we understand your requirements and provide the best suitable solution.

Special machines

The special machines manufactured by Tuboly-Astronic are mainly specific winding machines or cutting and special stacking solutions complying with our customers' individual needs and requirements.

ServiceAll machines made by Tuboly-Astronic are quality products guaranteeing an enhanced degree of reliability. We will process your request immediately. Service contract customers enjoy additional benefits.
